

Mapping ODA research and innovation (MODARI)

ODA research and innovation project interactive map – User guide

Updated March 2024

Background

There has been a long-standing need for more joined up information on research and innovation activities funded by UK Official Development Assistance (ODA). UKCDR have worked across UK government funders and their delivery partners to improve the availability and consistency of data on funded projects.

An interactive map can be found <u>on the UKCDR website</u>, which can be used to search active ODA projects by country, funder and partner, and to download the data in Excel format.

This user guide walks through four example ways of using the map:

- 1) Viewing projects relevant to a specific country
- 2) Viewing projects for a particular funder/fund
- 3) Viewing projects using a keyword search
- 4) Exporting project data in Excel

1) Viewing projects relevant to a specific country

Step 1: Select a specific country

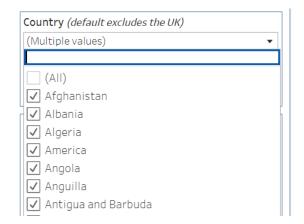

The easiest way to select a country is by clicking on it on the map (you can hover over a country on the map and it will give you the name of the country before clicking):

Alternatively, and/or if you want to select multiple countries:

- Click on the Country drop-down menu and unselect 'All' by unchecking the tick box;
- Select the country/countries of interest and press Enter on your keyboard to exit the menu:

■ UK International

Click the button "View projects":

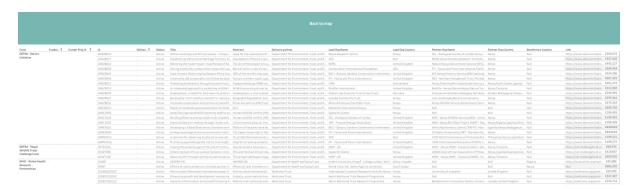

Note: There is an additional location filter – 'Select geography type' – that allows you to filter to one of or both of 'Beneficiary' and/or 'Location of activity':

Step 2: View the table of projects

The table shows one row per project with information on the delivery partner, lead organisation, partner organisation etc. as well as a link to the project page. (Use the scroll bar on the right-hand side to view the full list.)

If fields are unpopulated, either the information is not applicable to the project or not available in the underlying data source. This is especially applicable to the different types of ID available (funder programme, funder project, delivery partner), as not all funders use all of these (as can be seen in the above example of DEFRA's projects).

2) Viewing projects for a particular funder/fund

Step 1: Filter by fund

- Click on the Fund drop-down menu and unselect 'All' by unchecking the tick box;
- Select the fund(s) of interest and press Enter on your keyboard to exit the drop-down menu:

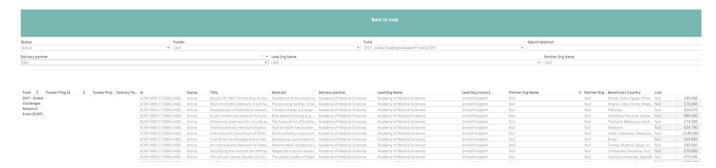

Step 2: View the table of projects by clicking "View projects":

The table shows one row per project with information on the delivery partner, lead organisation, partner organisation etc. as well as a link to the project page. (Use the scroll bar on the right-hand side to view the full list.)

There is more functionality when you view projects this way (rather than clicking on a country) and users can apply additional filters to the able:

3) Viewing projects using a keyword search

Step 1: Use the 'Abstract search' bar to filter by keyword/key phrase

- Type into the box a word or term you are interested in, e.g., "climate change"
- This will show the new number of projects where "climate change" is mentioned in the abstract
 - Note: This is not necessarily all climate change-related projects (nor will *all* projects using "climate change" in the abstract be specifically focused on climate change)
- Follow the same process as before by clicking 'View projects'

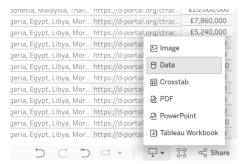

4) Exporting project data in Excel

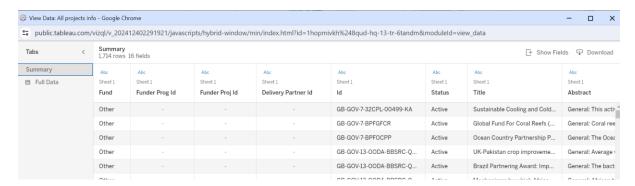

Step 1: Follow any of the above instructions to filter data or simply view <u>all projects</u> in the MODARI dataset by having no filters applied (including country) and clicking 'View projects'

Step 2: Click the 'Download' button in the bottomright corner of the Tableau visualisation. Select
'Data':

If this option is not available (i.e. greyed out), exit the Download menu and click on the table header to ensure the data table is selected. Return to the Download menu to try again

Step 3: Select the 'Download' button on the right to download the data as a csv file:

This will download summary data in csv (Excel) format, which is one row per project (not split by each country). Tableau gives the option to download the "Full Data" as well, which will show multiple rows per project (one per country attached to each project). For most users, the summary data will be sufficient and simplest to work with. For users downloading the full dataset, it is crucial to acknowledge that each project has multiple rows and pivot tables might be necessary to view some findings.

Dashboard notes

The default on the dashboard is that only active projects are shown. However, users can also view closed or cancelled projects by including these in the relevant filter.

Similarly, the country tab has the UK filtered out to show the world map without the UK. To include these projects all on one map, users can filter the UK back in and view all projects in one table using the relevant button.

The data can also be downloaded as an Excel file directly from the UKCDR MODARI webpage.

Data field	Field description					
Funder	Funding department					
Fund	The UK ODA research and innovation fund providing funding for the					
	project					
IDs (multiple)	IDs specific to funder programmes, funder projects, delivery partners					
ID	Main project ID					
Status	Active, closed, cancelled, unknown (status of project)					
Title	Project title					
Abstract/Description	Project description					
Month, Year of Start	Month and year of the start of the project					
Date						
Month, Year of End	Month and year of the end of the project					
Date						
Delivery partner	Organisation allocating/managing the project. Typically, this will be					
	directly receiving funding from a UK government department					
Lead organisation	Organisation receiving funding for and leading the project.					
Lead organisation	Country the lead organisation is based in					
country						
Partner	Other key direct or indirect recipients of funding with comparable role in					
organisation(s)	activity delivery to lead organisation					
Partner organisation	Country the partner organisation(s) is based in					
country(ies)						
Beneficiary country	Developing country(ies) of focus or benefit of the project – these should					
	be eligible for Official Development Assistance (ODA)					
Link	Web link to the source data					
Amount	Total value of the project over its lifetime (known or expected)
